*Monitoring the environment*

Accurate **RELIABLE** innovated

## nutradip™ instruments

Nutradip® pH & ppm/EC Meters & Testers are widely used in many applications including aquaculture, aquariums, skin & pet care, agriculture, hydroponics, school science programs, tanneries, food manufacturing & transportation, water conditioning, water analysis, water purification, printing, boilers & cooling towers, environmental analysis, skin care, swimming pools, spas, wine & beer manufacturing.

## Tri-Meter

Monitoring the Essentials

The Nutradip® Tri-Meter does it all! This convenient three in one meter measures the water's nutrient levels (PPM or EC), pH levels, & temperature simultaneously. The Tri-Meter is a continuous monitoring system requiring no batteries.

- Water Resistant
- 4 Digit Nutrient Display
- Easy to Read LED Display
- Detachable Probes & Adapter Board for Easy Carefree Warranty
- Monitors Temperature in Fahrenheit or Celcius depending on model.

QUALITY  
Experience - Easy Operation

## NUTRIENT METER

The Nutradip® Nutrient Meter has automatic temperature compensation & measures the TDS ppm/EC in your water. This continuous monitoring system requires no batteries.

## pH-METER

The Nutradip® pH-Meter has automatic temperature compensation & measures the acidity or alkalinity in your water. This continuous monitoring system requires no batteries.

TDS = Total Dissolved Solids  
EC = Electrical Conductivity  
ppm = Parts Per Million  
pH = Potential of Hydrogen
