

SC 540/840 *professional*

SC 540/840 *professional*

- variable speed control with no interference for whisper quiet operation.
- 240v 50Hz single phase AC output
- 2a and 3a versions
- designed to last
- voltage regulation by variable transformer

	Amps	max W	rrp £
SC540	2	540	95.00
SC840	3	840	115.00

The SC *professional* range of speed controllers can be used on all AC fans up to the allowable watt/amp rating guaranteeing absolutely fluid and vibration free speed control. If noise is an issue airforce SC professional series speed controllers offer optimum air exchange at acceptable volume.

	Amps	max W	rrp £
SCS5400	2	540	120.00
SCS8400	3	840	140.00

The SCS professional range of speed controllers all the advantages of the sc range with the addition if needed to shunt the fan from full speed to a predetermined speed setting controlled by thermostat, timer or other switching device.

SCS *professional* series illustrated

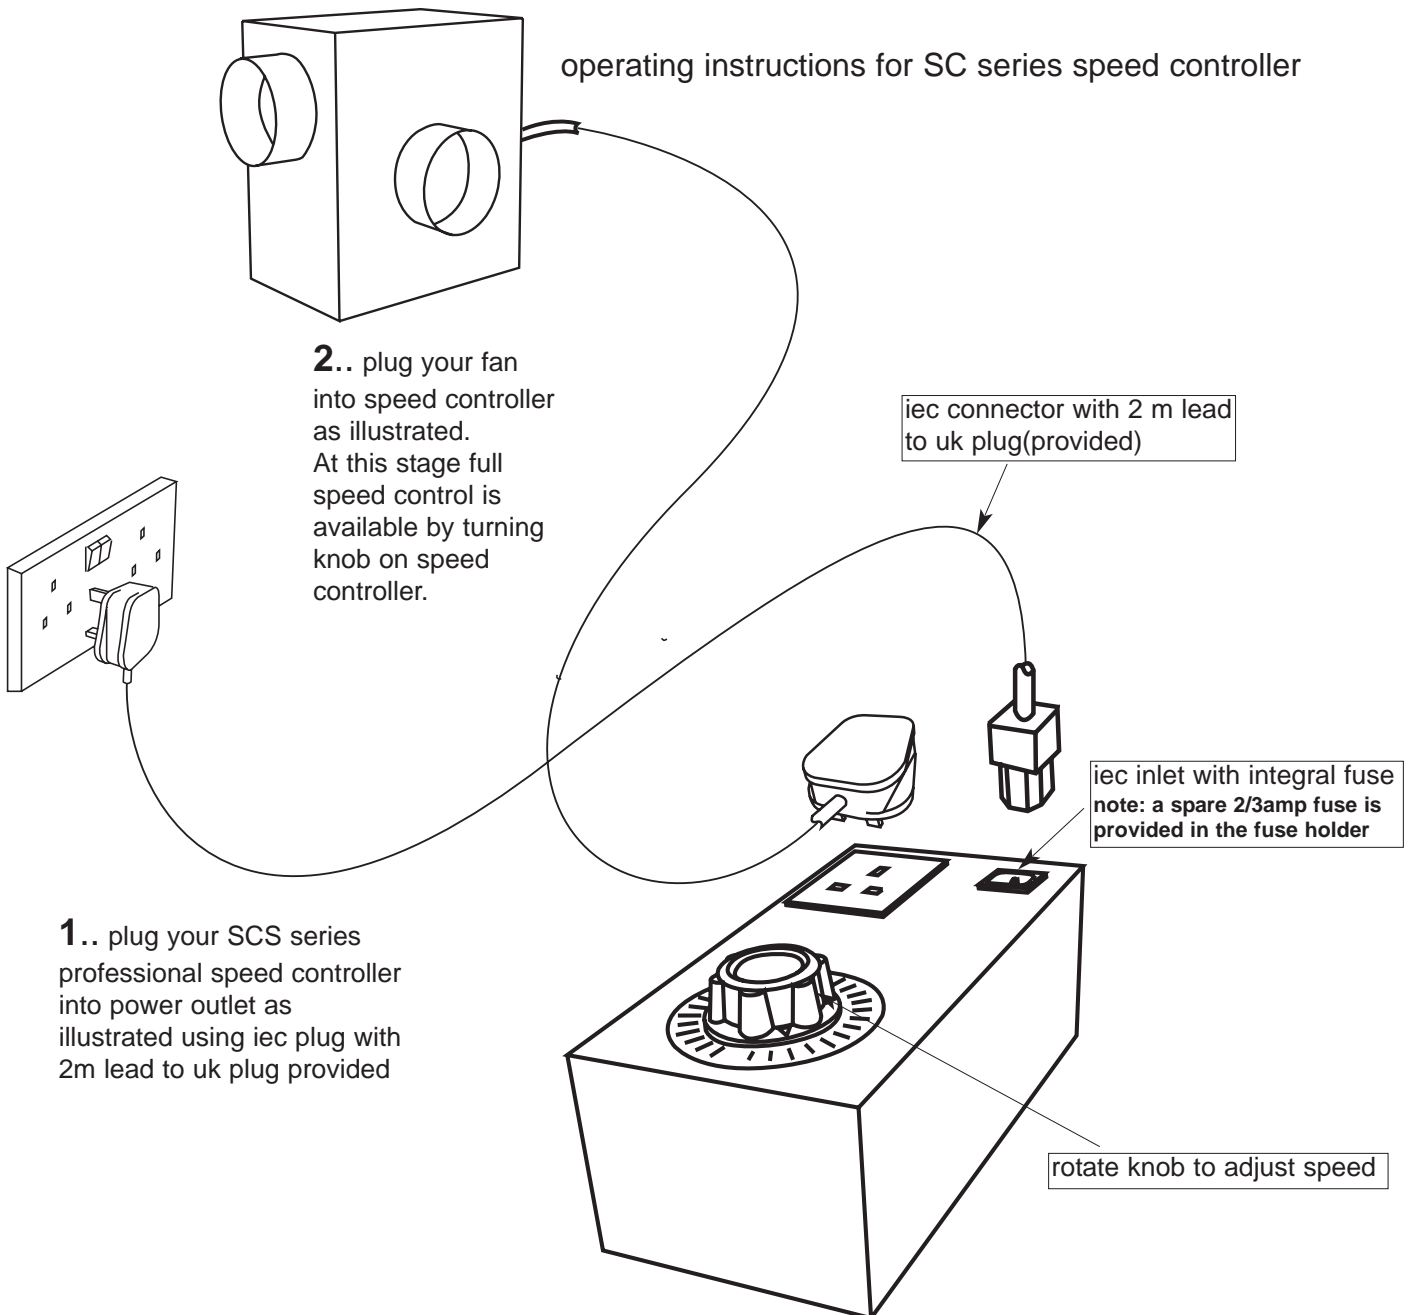

The most effective way to control the performance of a fan is to regulate the fan speed resulting in a change in volume and pressure output.

The most effective way to regulate fan speed is to use an airforce sc series professional speed controller.

SC540/840 *professional* speed controller

operating instructions for SC series speed controller

2.. plug your fan into speed controller as illustrated. At this stage full speed control is available by turning knob on speed controller.

1.. plug your SCS series professional speed controller into power outlet as illustrated using iec plug with 2m lead to uk plug provided

SC540/840 *professional*
Professional speed control for all AC fans/motors.

SC540- 2 amp max load *fused 2amp slow blow glass*

SC840- 3 amp max load *fused 3 amp slow blow glass*

max watts SC540 500W
max watts SC840 800W

you can adjust the speed of more than one fan as long as the total watts do not exceed the maximum stated above.
